Sections include:

- Introduction
- Specification

1.1 Introduction

SOM-5786 is an embedded COM Express Type 2 CPU module that fully complies with the PCI Industrial Computer Manufacturers PICMG COM Express standard. The new CPU module supports Intel Core Duo / Solo processor by Intel GME965/ICH8-M chipset which supports faster integrated graphic engine, PCI Express and SATA interfaces. In a basic form factor of 95 mm x 125 mm, the SOM-5786 provides a scalable high performance and easy to integrate solution for customers' applications by utilizing a plug-in CPU module on an application-specific customer solution board. The SOM-5786 with advanced I/O capacity incorporates serial differential signaling technologies such as PCI Express, Serial ATA, USB 2.0, LVDS, HD Audio and Serial DVO interfaces. SOM-5786 offers design partners more choices for their own applications needing higher computing speeds while maintaining a compact form factor.

SOM-5786 complies with the "Green Function" standard and supports Doze, Standby and Suspend modes. The small size (95 mm x 125 mm) uses two high capacity connectors based on the proven SOM-Express form factor, allowing the SOM-Express modules to be easily and securely mounted onto a customized solution board or our standard SOM-DB5700 development board.

The SOM-5786 is a highly integrated multimedia SOM that combines audio, video, and network functions. It provides high quality TV out, dual channel LVDS interface for large size TFT LCD display, DDR2 memory up to 4 GB, high definition audio interface (AC97/Azalia), 25 to 112 MHz..
